

**IN THE SPECIFICATION:**

Please replace the paragraph appearing on page 1, lines 4-11 of the specification, with the following amended paragraph:

-- The present invention is related to *Method and Apparatus for Viewing and Managing Information in a History*, serial no. 09/884,491, attorney docket no. AUS920010545US1 and *Method and Apparatus for Removing Information from a Server*, serial no. 09/884,490, attorney docket no. AUS920010546US1, filed even date hereof, assigned to the same assignee, and incorporated herein by reference. --

Please replace the paragraph appearing on page 13, line 29 to page 14, line 3 of the specification, with the following amended paragraph:

-- Additionally, the mechanism of the present invention also allows a user to preview a Web page or other data structure, such as a cookie, that contains information corresponding to information defined by the user. This mechanism allows a user to delete a file or skip to the next one that contains information corresponding to that defined by the user. --

Please replace the paragraph appearing on page 16, lines 2-14 of the specification, with the following amended paragraph:

-- Browser 400 is presented as an example of a browser program in which the present invention may be embodied. Browser 400 is not meant to imply architectural limitations to the present invention. Presently available browsers may include additional functions not shown or may omit functions shown in browser 400. A browser may be any application that is used to search for and display content on a distributed data processing system. Browser 400 may be implemented using known browser applications, such as Netscape Navigator or Microsoft Internet Explorer. Netscape Navigator is available from Netscape Communications Corporation while Microsoft Internet Explorer is available from Microsoft Corporation. --
